

1. a three man space module
2. a gene sequencing program
3. long-term survival techniques
4. profit-oriented drug research
5. rising carbon dioxide levels
6. an 88 millimetre (diameter) steel tube
7. bone destroying cancer cells
8. a 4-day trial period
9. satellite controlled sensing techniques
10. a four-legged, six-winged insect

1. might / may (have)
2. should
3. must have
4. could / can
5. may / could / might have
6. will
7. assume
8. feasible
9. expected
10. likely
