

WRITING BIBLIOGRAPHICAL REFERENCES

1. Introduction :

The bibliography is a structured list of sources (books, articles, web pages, etc.) consulted for the development of a work (dissertation, internship report, article, summary, etc.)

The bibliography is made up of bibliographic references.

A bibliographic reference is the set of elements that describe a document (author, title, publisher, year, url, etc.) and which allow it to be identified.

2. What is the importance of bibliographic references?

- Justify the content of your document by allowing the reader to assess the validity of the information presented and to deepen its research by reading the sources, and to deepen the points which might interest him.
- Respect the intellectual property of the authors on whom you base your work.
- Demonstrate that your document has been researched in-depth, which reinforces the credibility of the work carried out.

3. Ranking of references

The bibliography is classified by:

- Type of document: printed or electronic
- Alphabetical order of authors
