

Paragraph Types: Compare and/or Contrast

A compare and/or contrast paragraph is required if you are asked to examine similarities and/or differences. Compare focuses on similarities. Contrast focuses on differences. Essay questions of this type will involve the use of several compare/contrast paragraphs that will work together as a whole.

Topic sentence identifies the topic/feature of X and/or Y and the intention to compare/contrast the similarity or difference.

Support Sentences describe/compare features of chosen topics

Concluding Sentence summarises paragraph content depending on which approach has been taken.

Useful transitional words and phrases

For comparison

Similar to, similarly, in the same way, like, likewise, equally, again, also, too, each of, just as, so

For contrast

In contrast, on the other hand, different from, whereas, while, unlike, however, but, although, conversely, yet, unlike

Sample paragraph 1

What characteristics distinguish plants from animals?

There are several characteristics which distinguish plants from animals. Green plants are able to manufacture their own food from substances in the environment. This process is known as photosynthesis. In contrast, animals, including man, get their food either directly from plants or indirectly by eating animals which have eaten plants. Plants are generally stationary. Animals, on the other hand, can usually move about. In external appearance, plants are usually green. They grow in a branching fashion at their extremities, and their growth continues

throughout their lives. Animals, however, are very diverse in their external appearance. Their growth pattern is not limited to their extremities. It is evenly distributed and only occurs in a definite time period. Therefore, the differences between plants and animals are quite significant.

Sample paragraph 2

What is the difference between allopathy and homeopathy?

Allopathy and homeopathy are quite different. Allopathy is the treatment of disease of one kind by exciting a disease of another kind or in another part. It is sometimes incorrectly used as a name for orthodox medicine or Western medicine. Homeopathy, in contrast, is a system of medicine based on the treatment of a given disease by administering small quantities of a drug which produces the symptoms of that disease in a healthy person. The treatment of illnesses, then, would be markedly dissimilar because the underlying beliefs are strongly differentiated.
